## INTRODUCTION

In the ABCs book, we will work primarily with hieroglyphs (glyphs) in the form of Christ Dragon Codes learning to embody the essence of each Code. This is where intentionality and authenticity come in.

The Christ Codes Dragon Light Language is for the Golden Age of Miracles. It is an ancient language in a new form that will be given in all its applications and nuances for your understanding.

Using the English Alphabet as its foundational basis, the elements of sound originate from the ancient language of The Sophia and the Christ Dragons.

The Christ Dragon Codes shape a new reality to function within by changing the shape of your dreams and your reality. They naturally communicate to your heart through each Dragon Code and DNA cipher.

Each Dragon Code creates from a pure essence or emanation to birth and manifest miracles, creating the New Earth working with the Master Dragon Codes.

The architecture within the Christ Dragon Codes corresponds to the sacred geometry that underlies and upholds all consciousness and form as grids of light.

**PART I**  
**THE ESSENCE OF LANGUAGE**

## THE ARCHETYPAL BLUEPRINT FOR A NEW LANGUAGE

**T**he *Christ Codes* were born out of my prayer to *Divine Mother Sophia*<sup>1</sup> to learn how to commune with my wounded heart and the injured parts of myself that had created so much pain and suffering in my life.

Setting my intention for the receipt of my spiritual gifts with greater clarity and purpose, I entered a room filled with gold books. Jesus was present with one of the books opened before me.

I asked what was contained in the book and was told it was the knowledge I would be bringing to the world. The knowledge would be downloaded into me as code into my sacred heart's Divine Atom and throughout the cells of my body.

Shortly thereafter, I started receiving the energetic blueprint for the Christ Codes. They were seeded within a blue rainbow light-ray transmission into the sacred atom of my heart and into the cells of my body as blue luminescent diamonds of light.

Afterward, I recalled a vision where I was transported inside of the *Metatron Cube* where the "Mind of God" was sending out a new archetypal blueprint for speaking in a more advanced language. It appeared as a fireball coming from heaven. When I asked: "What am I to manifest in this Golden Age?" I heard the word, "SOUND."

I saw that sound continually vibrates throughout the cosmos as love emanating from Divine Mother Sophia. We unite with it by entering the portal in our hearts and connecting to the sacred heart of Sophia.

## THE POWER OF LANGUAGE

**W**e have been taught to look at the alphabet to describe and communicate our everyday reality, not realizing that naming and describing our reality is an act of creation.

We are given Sophia soul powers to co-create the world we live in. However, because of negative programs and false beliefs, we often create a living hell rather than paradise realities.<sup>1</sup>

We are creatures that communicate through language and symbols. Consequently, language shapes our reality which affects our relationship with the space-time continuum.

Consciousness is held within the quantum field and is accessible by everyone. What you are capable of thinking is based on your vibration of energy. You magnetically attract into your field thought forms that are aligned with your resonance. By increasing your vibration, you increase your resonance and your ability to attract expanded levels of thought.

There is a body of evidence that demonstrates that consciousness informs itself through its creations. From this perspective, when you become conscious of the language you are speaking, it opens a whole new realm of possibilities.

When using the Christ Dragon Light Language, you are communicating directly with the quantum field using coded Light Language. The power of understanding and communing from a language based on Unity Christ Consciousness opens and directs infinite potentials within the Divine Matrix.<sup>2</sup>

“The Divine Matrix is the [hexagonal] container that holds the universe and is the bridge between all things that show and mirror what you have created.”<sup>3</sup>

It is entirely normal and natural for our DNA to react to sounds, symbols, and language. Spiritual and Esoteric Teachers have known for ages that the body is programmable through symbols, words, and thoughts. However, to be successful, the correct frequency must be used along with **establishing conscious communication with your DNA.**

The more highly developed an individual's consciousness is, the less need there is for any type of intermediary device. In addition, there is evidence for a new type of medicine in which DNA can be influenced and reprogrammed by words and frequencies without surgical intervention. **In fact, it is through sound that DNA is manifested.**

*Russian scientists found that DNA can cause disturbing patterns in the quantum vacuum, thus producing magnetized wormholes! These are tunnel connections between entirely different areas in the universe through which information can be transmitted outside of space and time. Your DNA attracts these bits of information and passes them on to your consciousness.*<sup>1</sup>

## The Superconscious

What science terms as hyper-communication is what spiritualists call the superconscious. The superconscious is most often encountered when you suddenly gain access to information that is outside of your knowledge base. The superconscious is then experienced as inspiration, revelation, intuition, visions, guidance, or prophetic dreams or visions.

The superconscious is most commonly experienced in a state of relaxation. When the superconscious is experienced, a special phenomena can be observed in the DNA, as well as in the person.<sup>2</sup>

An example of this would be my receipt of the Christ Codes. I started receiving information in my dreams and visions about a new way to relate to the alphabet, numbers, and sound frequencies that were outside of my field of knowledge and reached technical details about which I knew nothing about.

In their book *“Vernetzte Intelligenz”* (Networked Intelligence), Grazyna Gosar and Franz Bludorf explain that in earlier times humanity was strongly connected and acted through group consciousness.

In order to develop and experience individuality, we nearly lost our ability to hyper-communicate. Now that our individual consciousness is evolving, we can create a new form of group consciousness, namely one in which we gain access to all information via our DNA through the superconscious or unity Christ Consciousness.

We now know that our DNA can feed data into the quantum field, can call up data from the field, and establish contact with other participants. Remote healing, telepathy, or *remote sensing* can thus be explained.

Hyper-communication in the new millennium means something quite different: Researchers think that if humans with full individuality would regain group or unity Christ Consciousness, they would regain their god-like power to create, alter, and shape things on Earth!

Humanity is collectively moving toward this new form of group consciousness. Researchers in group consciousness have formulated the theory of Type I Civilizations.

A humanity that developed group or unity Christ Consciousness would have neither environmental problems nor scarcity of energy.

If we were to use our mental power as a unified civilization, we would be able to control the energies on earth as a natural consequence, including all natural catastrophes!

A theoretical Type II Civilization would be able to control all energies in their home galaxy.<sup>3</sup>

## LIGHT LANGUAGE

### THE TONES OF CREATION

Computer code communicates much like Light Language. The numbers correlate to colors which correlate to pictures that give you direction.

In language, the directions correlate to the basic rules of grammar. Then you have the language itself which would be the stream of thought or consciousness producing a picture. These are the building blocks within the structure of language.

In contrast, the *Seed Sounds* or *Tones of Creation* that you hear with your inner ears are expressed through layers or aspects of the cosmos communing with you as the Music of the Spheres through your chakra centers and meridians.

The Music of the Spheres move as cosmic waves weaving the dream of Sophia. Great symphonies carry the master images from the heavenly spheres, each singing a different tune and dancing a different dance.

The Music of the Spheres play you as an instrument of love. This is how you receive the master archetypal

images on the waves of these great symphonies— dancing on the cosmic ocean, weaving the symphonies of Heaven.

The higher vibrational sounds or tones that move through the sound current must be merged into one where the voice of Sophia is clearly heard as the AUW sound.<sup>1</sup> To do this you must travel into the sound to its Source.

When you dance the cosmic dance, you are freed from all illusion of relativity consciousness. You weave the dance of the cosmos through the alignment of your instrument with the blueprints of life as the Seed of Life, the Flower of Life, and the Fruit of Life,<sup>2</sup> all found in the Metatron Cube<sup>3</sup> and contained within the Tree of Life.
